PROFESSIONAL SUMMARY

Junior Backend .NET Developer with a B.Sc. in Computer Science (2026) and hands-on project experience with ASP.NET Core, Entity Framework Core, and SQL Server. Built RESTful APIs with JWT authentication, role-based authorization, and relational database design. Currently a Charging & Billing Intern at Zain Jordan, working with telecom packages, billing configurations, and SQL-based data analysis.

TECHNICAL SKILLS

Programming Languages: C#, C++, JavaScript, SQL
Core Concepts: Object-Oriented Programming (OOP), Dependency Injection, Layered Architecture, REST API Design
Backend: ASP.NET Core Web API, ASP.NET MVC, RESTful APIs, Clean Architecture, JWT Authentication, Role-Based Access Control (RBAC)
Database: SQL Server, Oracle SQL, Entity Framework Core, Database Design, Transactions, Data Validation
Frontend: Angular, HTML, CSS, Bootstrap
Desktop: Windows Forms (C#)
Tools and Practices: Git, GitHub, Docker, Postman, Swagger/OpenAPI, Unit Testing (xUnit), Agile/Scrum
Domain: Telecom Charging and Billing

PROFESSIONAL EXPERIENCE

Charging and Billing Intern | Zain Jordan
05/2026 - Present | Amman, Jordan

- Configure and manage telecom packages, services, and offers based on business requirements within a large-scale charging and billing environment.
- Create and maintain billing configurations for Zain telecom services.
- Write SQL queries to retrieve, analyze, and validate subscriber and service data.
- Test and validate charging behavior of services and packages before deployment.
- Work with business-critical systems processing high volumes of subscriber transactions, and understand how charging integrates with billing, provisioning, and customer management.

Full Stack .NET Developer | Orange Coding School
02/2026 - 05/2026

- Completed full-stack training covering OOP with C#, front-end development (HTML, CSS, JavaScript), ASP.NET MVC, and databases (SQL Server, Entity Framework Core).
- Built RESTful APIs with ASP.NET Core Web API using Clean Architecture, with JWT/RBAC authentication, validation, and structured error handling.
- Worked in Agile/Scrum teams using Git, GitHub, and Postman.

PROJECTS

Booking Management Service | Backend Developer
ASP.NET Core Web API, EF Core, SQL Server, DTOs

- Built a RESTful API for resource allocation, user scheduling, and booking lifecycle management, with real-time availability checks and slot overlap prevention.
- Used Serializable Transactions to handle concurrent requests and prevent race conditions and double bookings.

E-Commerce Web Application | Full Stack Developer
ASP.NET Core Web API, Angular, EF Core, SQL Server

- Developed a full-stack platform with separate Admin and Customer roles secured by JWT and RBAC.
- Built product management, shopping cart, orders, and reviews, with search, filtering, and pagination.

EduScope | Backend Developer (Team Project, Agile/Scrum)
ASP.NET Core Web API, EF Core, SQL Server, JWT, Clean Architecture

- Designed the full SQL Server schema, including relationships, constraints, and data integrity rules.
- Implemented JWT authentication with three roles (Admin, Trainer, Student).
- Developed core modules: session management, agendas, and evaluation reports with validation and layered error handling.

Gold Price Tracker | Front-End Developer

- Built a responsive web app that displays live gold prices by consuming external APIs asynchronously (HTML, CSS, JavaScript, Fetch API).

EDUCATION

B.Sc. in Computer Science | Al-Hussein Bin Talal University, Ma'an | 2022 - 2026

VOLUNTEERING

- Volunteer, U20 World Wrestling Championships, Amman, Jordan (2023).
- Volunteer, U15-U20 Asian Wrestling Championships, Amman, Jordan (2023).

LANGUAGES

Arabic (Native) | English (Intermediate, with strong technical reading)
